

# BrightBeam Tactical LED Flashlight — Model TF-900

| Attribute                   | Specification                                  |
|-----------------------------|------------------------------------------------|
| Product Name                | BrightBeam TF-900 Tactical Flashlight          |
| Category                    | Tactical Flashlights                           |
| Dimensions                  | 5.5 x 1.2 x 1.2 in                             |
| Weight                      | 4.8 oz                                         |
| Material                    | Aircraft-grade aluminum alloy, anodized finish |
| Voltage                     | 3.7V (see power section)                       |
| Power Rating                | Operates on 2x CR123A batteries at 6V nominal  |
| Certifications              | IPX8 waterproof rating                         |
| Warranty                    | Lifetime limited warranty                      |
| Operating Temperature Range | -40C to 60C                                    |

Note: the spec table lists 3.7V in the Voltage row, but the Power Rating row separately states the unit runs on batteries at 6V nominal. This is an intentional inconsistency in this sample document, included to test SpecSense's ability to flag contradictory specs for human review.

Output: 1200 lumens max, 5 brightness modes, strobe function.
