

GuardPro Industrial Safety Helmet — Model SH-700

Attribute	Specification
Product Name	GuardPro SH-700 Industrial Safety Helmet
Category	Personal Protective Equipment (Head Protection)
Material	High-density polyethylene (HDPE) shell
Weight	380 g
Size Range	Adjustable, fits head circumference 53cm - 63cm
Certifications	ANSI Z89.1 Type I Class E, EN 397
Impact Rating	Type I (top impact protection)
Electrical Rating	Class E — tested to 20,000 volts
Color Options	White, Yellow, Orange, Blue
Operating Temperature Range	-30C to 50C
Suspension System	4-point ratchet suspension, adjustable
Warranty	3-year limited warranty

The GuardPro SH-700 is engineered for construction, utility, and industrial environments requiring both impact protection and electrical hazard resistance.

Meets ANSI/ISEA Z89.1-2014 Type I Class E standards for reduced electrical conductivity, protecting against accidental contact with energized conductors up to 20,000 volts.

Note: Electrical rating (Class E) refers to the helmet shell only and does not make the wearer immune to electric shock; always follow lockout/tagout procedures. This is an intentional detail included to test attribute extraction beyond standard fields like voltage or material.

Ventilation: non-vented (required for electrical-rated helmets). Accessories (chin strap, face shield mount) sold separately.
